- A** Pregrooved Deck Boards*
- B** Ipe Clip® Hidden Deck Fastener
- C** Stainless Steel Torx Drive Screws
- D** Ipe Plug
- E** Floor Joists

The initial screw in the 1st decking board should be face screwed and an Ipe Plug can be used to plug the exposed hole.

** Stainless steel torx drive screw should be driven at a 45° angle through the deck board and into the floor joist.

*Slots can be cut with a biscuit joiner in standard deck boards.
** Screws should be driven at a 90° angle into the floor joist for composite material.
